

INGREDIA SUPPORT

Last updated: August 28, 2026

SUPPORT SCOPE

Ingredia helps users scan packaged food products, compare them against a personal allergy profile, and review possible alternative items.

Support can help with:

- app usage questions
- barcode scanning issues
- product lookup failures
- language or profile setup questions
- clarification about what the app can and cannot guarantee

IMPORTANT SAFETY REMINDER

Ingredia does not guarantee that a product is safe to eat.

Always check:

- packaging
- ingredients list
- allergen labeling
- trace warnings
- manufacturer updates

KNOWN LIMITATIONS

- product information depends on Open Food Facts
- database coverage varies by country
- some products may be missing
- some product records may be incomplete or outdated
- fresh lookups and alternative search require internet access

SUGGESTED TROUBLESHOOTING

SCANNER DOES NOT DETECT THE BARCODE

- confirm camera permission is enabled
- increase lighting
- move the phone slightly closer or farther away
- make sure the barcode is fully visible

â€ print test barcodes at full scale when possible

PRODUCT NOT FOUND

â€ the product may not exist in Open Food Facts

â€ the barcode may scan correctly even if no product record exists

â€ try again later in case of temporary service issues

ALTERNATIVES DO NOT APPEAR

â€ the product may not include enough category data

â€ the available candidate products may conflict with the active profile

â€ the network request may have failed temporarily

RELEASE CONTACT PLACEHOLDER

Before App Store release, replace this section with:

â€ support email

â€ support website URL

â€ response expectations if you want to publish them
